

[Omar Wael](#) is an experienced data scientist and web developer with over 3 years in e-commerce and payment gateway integrations. He combines expertise in developing scalable web solutions with a strong background in data science, specializing in AI, machine learning, and anti-money laundering systems. Omar has worked on diverse projects, including research in large language models and freelance data analytics.

Machine Learning Experience:

1. **AI Diploma Graduate (04/2021 – 11/2021)**
Information Technology Institute (ITI)
 - Completed a **9-month diploma** in Artificial Intelligence (2021).

2. **Teaching Assistant (01/2022 – 06/2024)**
Data Science Program, The American University in Cairo (AUC)
 - **2 years** of experience supporting academic activities, guiding students, and assisting in data science projects and coursework.

3. **Data Scientist (06/2022 – [present](#))**
Anti-Money Laundering Team, Data Gear, Egypt
 - Worked for **2 years and 6 months** in developing data-driven solutions to identify and combat financial crimes.

4. **Freelance Data Scientist (2023)**
Upwork ([My profile](#))
 - Successfully delivered projects for multiple clients over **1 year**, earning over **\$1,000** in diverse data science and machine learning tasks.

5. **Machine Learning Researcher (06/2024 – [present](#))**
Intelligence Stream Labs, Germany (Part-time)
 - Conducted machine learning research for **6 months**, focusing on cutting-edge AI projects.

6. **Research Assistant (07/2024 – 07/2025)**
Large Language Models (LLMs) Project, The American University in Cairo (AUC)
 - Contributed to a **1-year research project** centered on developing and fine-tuning Large Language Models.
 - This project is part of my **Master Degree** in Cairo University in **RAG Applications**
